Search by name... 

"CASE" expressions should not have too many "WHEN" clauses		Code Smell
Sections of code should not be commented out		Code Smell
Unused procedure and function parameters should be removed		Code Smell
Track uses of "FIXME" tags		Code Smell
Redundant pairs of parentheses should be removed		Code Smell
Functions and procedures should not have too many parameters		Code Smell
Collapsible "if" statements should be merged		Code Smell
Unused labels should be removed		Code Smell
Using hardcoded IP addresses is security-sensitive		Security Hotspot
Column references should not have more than two-parts		Code Smell
Triggers should not "PRINT", "SELECT", or "FETCH"		Code Smell

"CASE" expressions should not have too many "WHEN" clauses

Analyze your code

 Code Smell  Major   brain-overload

CASE expressions with large sets of `WHEN` clauses are difficult to understand and maintain, and should be refactored to include fewer `WHEN` clauses.
