Packages

Package	Description
org.h2.api	Contains interfaces for user-defined extensions, such as triggers and user-defined aggregate functions.
org.h2.engine	Contains high level classes of the database and classes that don't fit in another sub-package.
org.h2.fulltext	The native full text search implementation, and the wrapper for the Lucene full text search implementation.
org.h2.jdbc	Implementation of the JDBC API (package java.sql).
org.h2.jdbcx	Implementation of the extended JDBC API (package javax.sql).
org.h2.tools	Various tools.
