

Comments should not be nested

Analyze your code

Code Smell

Minor

- bug
- confusing

PL/SQL does not support nested C-style (`/* ... */`) comments.

Noncompliant Code Example

```
/*  
  
    This is a comment block, for which the ending tag was omitted  
  
    It may be difficult to figure out that the following line of code is actually  
commented  
  
  
variable = function_call();  
  
/* variable contains the result, this is not allowed, as it is an attempt to create  
an inner comment */
```
