**Lines in a multiline comment should start with `"*`**

## Analyze your code

Code Smell Minor ? convention

Multi-line comments are more readable when each line is aligned using the "\*" character. At most one violation is created for each comment

### Noncompliant Code Example

```
/*
this line is not aligned and ugly Non-Compliant
no violation is created on this line, even though is it also bad
*/

/* this is Compliant */
```

## Compliant Solution

```
/*
 * this is much better Compliant
 */

/* this is Compliant */
```
