Search by name... 

Unused local variables should be removed
 Code Smell
Local variable and parameter names should comply with a naming convention
 Code Smell
Empty statements should be removed
 Code Smell
Track uses of "TODO" tags
 Code Smell
A primary key should be specified during table creation
 Code Smell
Track lack of copyright and license headers
 Code Smell
SHA-1 and Message-Digest hash algorithms should not be used in secure contexts
 Vulnerability
"NOCOUNT" should be activated on "PROCEDURE" and "TRIGGER" definitions
 Code Smell
Control flow statements "IF", "WHILE" and "TRY" should not be nested too deeply
 Code Smell
"CASE" expressions should end with "ELSE" clauses
 Code Smell
"IF ... ELSEIF" constructs should end with "ELSE" clauses
 Code Smell
Control statements should have BEGIN ... END

Unused local variables should be removed

Analyze your code

 Code Smell  Minor   unused

If a local variable is declared but not used, it is dead code and should be removed. Doing so will improve maintainability because developers will not wonder what the variable is used for.
