

## pg 0.18.4

Pg is the Ruby interface to the {PostgreSQL RDBMS}[<http://www.postgresql.org/>]. It works with {PostgreSQL 8.4 and later}[<http://www.postgresql.org/support/versioning/>]. A small example usage: `#!/usr/bin/env ruby  
require 'pg'  
# Output a table of current connections to the DB  
conn = PG.connect( dbname: 'sales' )  
conn.exec( "SELECT * FROM pg_stat_activity" )  
do |result| puts " PID | User | Query"  
result.each do |row| puts " %7d |  
%-16s | %s " % row.values_at('procpid', 'username', 'current_query')  
end end`
