 Code Smell59

Tags

Search by name...

Conditionals should start on new lines

 Code Smell

"INSERT" statements should explicitly list the columns to be set

 Code Smell

Output parameters should be assigned

 Bug

Queries that use "TOP" should have an "ORDER BY"

 Bug

All branches in a conditional structure should not have exactly the same implementation

 Bug

"WHERE" clause conditions should not be contradictory

 Bug

Unary prefix operators should not be repeated

 Bug

"NULL" should not be compared directly

 Bug

Related "IF"/"ELSE IF" statements and "WHEN" clauses in a "CASE" should not have the same condition

 Bug

Identical expressions should not be used on both sides of a binary operator

 Bug

All code should be reachable

 Bug

Loops with at most one iteration should be

Conditionals should start on new lines

 Code Smell

 Critical

 suspicious

Code is clearest when each statement has its own line. Nonetheless, it is a common pattern to combine on the same line an `IF` and its resulting *then* statement. However, when an `IF` is placed on the same line as the closing `END` from a preceding `ELSE` or `ELSE IF`, it is either an error - `ELSE` is missing - or the invitation to a future error as maintainers fail to understand that the two statements are unconnected.

Noncompliant Code Example

```
IF (condition1) BEGIN
    EXEC something
END IF (condition2) BEGIN  -- Noncompliant
    EXEC something
END
```

Compliant Solution

```
IF (condition1) BEGIN
    EXEC something
END ELSE IF (condition2) BEGIN
    EXEC something
END
```

Or

```
IF (condition1) BEGIN
    EXEC something
END

IF (condition2) BEGIN
    EXEC something
END
```
