Logs into the OracleDB for Azure sign-up page using their Azure credentials.

- Grants OracleDB for Azure a minimal permission set needed to complete the automated account
- linking process. Is redirected to the onboarding landing page where they select the Guided Onboarding option.
- With those steps complete, the process:

tenant's Azure Active Directory.

Creates OracleDB for Azure groups in the Azure tenant's Azure Active Directory.

Creates an Oracle Database Service (ODS) enterprise application and custom roles in the Azure

- Creates a Multicloud Link (MCL) configuration in the user's OCI tenancy.
- Creates and configures the private link between Azure and OCI using OCI Interconnect for Azure.
- Redirects the browser to the OracleDB for Azure Portal.

OracleDB for Azure is not operational this point. An Azure administrator must link at least one Azure

databases and infrastructure for their Azure environment. Steps to link subscriptions are provided in

subscription to OracleDB for Azure before they can deploy or provision OracleDB for Azure

Note

Go to https://signup.multicloud.oracle.com/azure.

the next section.

Instructions To sign up for OracleDB for Azure without an existing OCI account (guided account)

linking)

These instructions apply to users starting a sign up on the Oracle for Azure website. See Preparation and Prerequisites for OracleDB for Azure before starting your sign up.

2. Log into your Azure account using the Microsoft account login dialog. You will be asked to grant Oracle the necessary Azure permissions required for the OracleDB for Azure sign up.

Read the Permissions requested information, then click Accept to grant the permissions and continue your sign up. If you choose not to grant the permissions, you will see the **Permissions not** provided screen that explains that your OracleDB for Azure subscription cannot be activated, and

provides you with a **Contact Support** button in case you have questions about the sign up process.

On the Welcome to Oracle Database Service for Azure page, read the information provided, then

- click Start guided account linking. On the Sign in to your Oracle Cloud account page, under Not an Oracle Cloud customer yet?, click **Sign Up**.
- On the Sign-up information for Oracle Cloud account page, enter your account details
- Check the I am human Captcha checkbox, then perform the verification in the Captcha dialog that opens.
 - Select your **Country**.

Home region: Select a home region for your OCI cloud account. Choose a region that offers

- the Oracle Interconnect for Microsoft Azure. (See Oracle Database Service for Azure Regional
- Availability for a list of OracleDB for Azure regions.) Your home region contains your account information and identity resources. It cannot be changed after your tenancy is provisioned. You can subscribe to additional regions in OCI later if you want to use OracleDB for Azure in other regions. See Oracle Database Service for Azure Regional Availability in this documentation for a complete list of OCI regions that support OracleDB for Azure. See <u>The Home Region</u> for more information on OCI home regions. Cloud account name: Name your new OCI cloud account. The cloud account name is used to sign in to the OCI Console, and can be changed later.
- **Create password:** Enter a password for your OCI cloud account.
- Tip

and OCI accounts are linked, you will not need to use a separate password to access the OracleDB for Azure portal.

Re-enter password: Re-enter your password. Enter your Contact information, including your mailing address and phone number.

If you decide to enable identity federation using Azure Active Directory after your Azure

- **Identity Verification:**
- a. Click **Add credit or debit card** to provide card details in the **Pay** pop-up dialog.
- Click Credit Card to add your credit card details. Only credit cards and debit cards are
 - accepted for account verification. Prepaid cards and virtual cards cannot be used. Click **Finish** to submit your card information. When the verification is complete, you can close
- the **Pay** dialog. 7. Check the box indicating that you have read and agreed to the terms of the **Oracle Customer** Agreement and Linking Azure and Oracle Cloud accounts documents. Click the link for each
- Click **Submit**. After the linking of your OCI account to your Azure account is complete, you will be taken to the OracleDB for Azure portal. Leave the OracleDB for Azure portal open in your browser, and use a

different tab or window to do the Azure subscription configuration that is described in Part 2.
