Oracle Database Service for Azure Regional Availability

Learn what Azure and OCI regions support OracleDB for Azure.

OracleDB for Azure uses the Oracle Interconnect for Microsoft Azure that's available in the locations listed on this page. OracleDB for Azure database resources must be provisioned in these OCI regions.

> ✎ **Note**
>
> OCI also offers Oracle Database Service@Azure, which hosts Oracle Exadata Databases in Azure data centers for the lowest possible latency. For the most flexibility, Azure Interconnect is a customer-provisioned private VPN between Azure and OCI, offering the flexibility of connecting an Azure tenancy to any OCI resource, including Oracle Databases provisioned in OCI .

If you already have an OCI tenancy, ensure your tenancy is subscribed to an OCI region listed on this page before you begin your sign up. See Managing Regions and Subscribing to an Infrastructure Region for more information.

> ✓ **Important**
>
> To use OracleDB for Azure with an existing OCI account, the home region of the OCI account must be a region with the Oracle Interconnect for Microsoft Azure.

Asia Pacific (APAC)

OCI region	Azure region
Japan East (Tokyo) NRT	Japan East (Tokyo)
Singapore (Singapore) - SIN	Southeast Asia (Singapore)
South Korea Central (Seoul) - ICN	Korea Central (Seoul)

Europe, Middle East, Africa (EMEA)

OCI region	Azure region
Germany Central (Frankfurt) - FRA	Germany West Central (Frankfurt)
Netherlands Northwest (Amsterdam) - AMS	West Europe (Amsterdam)
UK South (London) - LHR	UK South (London)
South Africa Central (Johannesburg) - JNB	South Africa North (Johannesburg)

Latin America (LATAM)

OCI region	Azure region
Brazil Southeast (Vinhedo) - VCP	Brazil South (São Paulo State)

North America (NA)

OCI region	Azure region
Canada Southeast (Toronto) - YYZ	Canada Central (Toronto)
US East (Ashburn) - IAD	East US (Virginia)
US West (Phoenix) - PHX	West US 3 (Phoenix)
US West (San Jose) - SJC	West US (California)
