Improper constraint forms should not be used

Analyze your code

Bug

 Blocker

Not every data type supports the `RANGE` or scale constraints. Using these constraints on incompatible types results in an `PLS-00572: improper constraint form used` exception being raised.

Noncompliant Code Example

```
DECLARE

  foo INTEGER RANGE 0 .. 42; -- Non-Compliant - raises PLS-00572 as NUMBER does not
support the RANGE constraint

BEGIN

  NULL;

END;

/
```

Compliant Solution

```
DECLARE

  foo INTEGER; -- Compliant

BEGIN

  NULL;

END;

/
```
